

Predictive Relationship: Rolling Log Difference Regression

Contents

1	Trading Strategy Description	2
2	Rule Parameters	2
3	Glossary	2

1 Trading Strategy Description

Regresses the one-day price changes against the gap between the research value and the price value. Assuming the regression gives a positive relationship the strategy takes bigger positions when the research is higher than the price series.

2 Rule Parameters

Below is a table summarizing the parameters specific to this trading rule.

Parameter Name	Default Value	Description	Symbol
Amplitude	0.1	Amplitude weighting (Kelly Fraction). 1.0 is maximum growth if regression is exact. <1.0 scales down positions taken.	Symbol
Regression Length	100	This is the number of days used to estimate the regression coefficients.	Symbol
